**KUKKO two-shell bearing puller
for diameters of Ø 56-70 mm**

Brand: Kukko

Reference: TUR 21-8

The Kukko-21-8 is an internal bearing puller designed for diameters from 56 to 70 mm. Its robust construction and extra-large edges ensure safe extraction. It includes a safety stop and is compatible with counterweights and slide hammers.

[View product online](#)**Description**

The Kukko-21-8 is an internal bearing puller designed to deliver exceptional performance in removing inner bearings, outer bearing rings, and bushings. Its robust and durable construction ensures a long service life, while its double-segment design with extra-large edges provides a secure grip during the extraction process. This model features an internal opening stop that protects the puller from the effects of overloading, minimizing the risk of breakage. It is also compatible with counterweights and slide hammers, making it a versatile tool for a variety of applications. For those who need to reach deeper bearings, optional 21-V series extensions are available. The Kukko-21-8 also includes a special Kukko grease tube, ensuring the spindle remains properly lubricated for optimal operation.

- Working diameter: Ø 56-70 mm
- Double-segment design with extra-large gripping edges
- Internal safety stop to prevent overloading
- Compatible with counter supports and impact bar
- Ideal for removing inner bearings and outer rings
- Robust construction for high performance
- Long service life
- Optional extensions available (21-V series)
- Includes special grease tube for lubrication
- Safe and efficient use in various applications

Specifications

High	5,50
Width	5,50

EAN	4021176011726
Manufacturer	Kukko
Weight (kg)	1,4400
Depth	13,80
