Description

The Kukko-21-90 is an internal bearing puller specifically designed for large ball bearings, outer bearing rings, and similar parts, with a diameter range of 100 to 200 mm. Its innovative 3-shell design with extra-large edges allows for safer and more efficient ejection, ensuring optimal performance with every use. This puller can be combined with both counterweights and slide hammers, making it a versatile tool for various industrial applications.

The Kukko-21-90 includes expandable parts that screw onto the bottom of the spindle, allowing the required opening to be adjusted to reach deeper bearings. Replacement parts are also available to ensure continuous use and maintenance of the tool.

Its robust design ensures a long service life, making it a reliable investment for professionals in the sector.

- Working diameter: 100-200 mm
- 3-shell version with extra-large edges
- Compatible with counter supports and slide hammers
- Expandable parts for opening adjustment
- Robust design and high performance
- Long service life
- Spare parts available
- Ideal for large ball bearings and outer rings
- Safe and efficient use
- Easy handling and adjustment

Specifications

High	11,00
Width	13,00
EAN	4021176012068
Manufacturer	Kukko
Weight (kg)	6,3000
Depth	30,50
