Description

The Kukko-69-C is a universal ball bearing puller set designed to deliver optimal performance in a variety of applications. This carefully selected assortment allows for versatile use, ensuring the safe removal of bearings from various brands, including SKF, FAG, Timken, and NTN, as well as other compatible manufacturers. The precise attachment of the bearing adapters ensures even traction on both the inner and outer raceways, minimizing the risk of damage during the removal process.

The Kukko-69-C storage system is designed to keep all components neatly organized and protected. Thanks to its special foam inserts, each tool stays securely in place, making it easy to access and extending the product's lifespan.

Furthermore, each part has an engraved number that allows for its identification and supply as a replacement part, ensuring that the necessary components for maintenance are always available.

- Universal use for bearings of various brands.
- Precise adapter clamping for safe removal.
- Uniform traction on inner and outer raceways.
- Safe storage in special foam.
- Components identifiable by engraved number.
- Compatible with SKF, FAG, Timken, NTN, and other manufacturers.
- Ergonomic design for ease of use.
- Durability and resistance under demanding working conditions.
- Ideal for machine shops and industrial applications.
- Easy maintenance and parts replacement.

Specifications

High	15,30
Width	36,00
EAN	4021176781544
Manufacturer	Kukko
Weight (kg)	7,4000
Depth	44,50
