Description

The Kukko-17-0 bearing separator is an essential tool for removing ball bearings, needle roller bearings, inner rings, and other parts in situations where space is limited and extraction legs cannot be used. Its innovative design includes a side screw that quickly and evenly secures the separating blades, allowing for simple and efficient handling. The recessed blades are designed to extract flush-mounted parts, ensuring a large contact surface that protects the part being extracted and provides maximum stability during the extraction process.

- **Working diameter:** Ø 5-60 mm
- **Pressure screw:** Tightens the separation jaws quickly and concentrically
- **Replaceable components:** All components can be supplied as replacement parts, identifiable by the number engraved on the part
- **Robust design:** High strength and durability
- **Extraction stability:** Maximum stability during use
- **Versatile use:** Ideal for various applications in mechanics and maintenance
- **Easy handling:** Enables intuitive and efficient use
- **Performance:** High performance in extraction tasks
- **Service life:** Long service life thanks to its quality construction

Specifications

High	2,20
Width	10,00
EAN	4021176008108
Manufacturer	Kukko
Weight (kg)	0,9500

Depth	18,50
