Description

The Kukko-17-1 Bearing Separator with Quick-Release Screw is a tool designed to facilitate the removal of ball bearings, needle roller bearings, inner rings, and other parts in confined spaces where conventional extraction legs cannot be used. Its side screw allows for quick and even attachment of the separating blades, ensuring efficient and safe handling. The recessed blades are designed to extract flush-mounted parts, while the large contact surface protects the part being extracted, ensuring maximum stability during the extraction process.

- Working diameter: Ø 12-75 mm
- Side pressure screw for quick and concentric adjustment
- Recessed blades for access to flush-mounted parts
- Large contact surface to protect the part being extracted
- Maximum extraction stability
- Interchangeable components, with engraved number for easy identification
- Robust design that guarantees high performance
- Long service life, ideal for professional use
- Easy handling and intuitive operation
- Compatible with a variety of applications in mechanics and maintenance

Specifications

High	2,50
Width	11,80
EAN	4021176008283
Manufacturer	Kukko
Weight (kg)	1,5000

Depth	21,00
