Description

The Kukko-135-2 separating fork is a tool designed to facilitate the disassembly of automotive and mechanical components. With a 23 mm opening, this tool is ideal for quickly loosening tie rod ends, steering rods, and similar parts. Its robust design allows for separating work in a variety of applications, including the removal of shock absorbers and other components requiring precise and efficient separation. To use it, simply strike the end of the handle with a hammer, providing the necessary force to separate the parts without damaging surrounding components.

- **Opening:** 23 mm
- **Material:** High-strength steel
- **Use:** Ideal for tie rod ends and connecting rods
- **Applications:** Shock absorber removal and separation work
- **Design:** Ergonomic handle for a better grip
- **Functionality:** Allows for quick and efficient separation
- **Compatibility:** Suitable for various mechanical parts
- **Dimensions:** Compact and easy to store
- **Professional Use:** Recommended tool for mechanics and workshops
- **Durability:** Construction designed for resist wear and tear

Specifications

High	2,00
Width	5,50
EAN	4021176024931
Manufacturer	Kukko
Weight (kg)	0,8100

Depth	33,80
