Description

The Kukko-135-5 is a breaker fork designed to facilitate the efficient and precise removal of automotive components. With a 45 mm opening, this tool is ideal for quickly loosening tie rod ends, steering rods, and other similar parts. Its robust design allows for breakaway work in a variety of applications, including the removal of shock absorbers and other components requiring effective separation. To use it, simply strike the end of the handle with a hammer, providing a safe and efficient method for freeing stuck parts.

- 45mm opening for a wide range of applications.
- Made from high-quality materials for durability.
- Ergonomic design for easy handling.
- Ideal for automotive mechanics and maintenance.
- Allows for quick and effective separation of parts.
- Compatible with tie rod ends and steering rods.
- Simple to use: strike the end of the handle with a hammer.
- Compact and easy to store.
- An essential tool for professionals and DIY enthusiasts.
- Versatile for various mechanical separation tasks.
