Description

The Ruko-101098 step drill bit is a high-precision tool designed for drilling sheet metal in various industries, including electrical, plumbing, heating, and automotive. Its innovative design incorporates a split point cutting edge according to DIN 1412 C, allowing for easier and more precise drilling starts. With a 118° cutting angle and a 90° taper angle, this drill bit ensures efficient and clean cuts.

The CBN (Cubic Boron Nitride) grinding and spiral chip flutes optimize the cutting process, minimizing noise, vibration, and burr formation. Each step of the drill bit is radially adjusted and ground, guaranteeing superior quality with every hole. Furthermore, the steps are laser-marked for ease of use.

This tool is suitable for sheet metal up to 4 mm thick and comes in a translucent plastic case with a hanger, ideal for storage and transport.
