Description

The Ruko-101050-9E step drill bit is a high-precision tool designed for drilling sheet metal in various industries, including electrical, plumbing, heating, and automotive. Its innovative design incorporates a split point cutting edge according to DIN 1412 C, allowing for easier and more precise drilling starts. With a 118° cutting angle and a 90° taper angle, this drill bit ensures efficient and clean cutting, optimizing performance with every use.

CBN grinding and spiral chip flutes contribute to noise-, vibration-, and burr-free cutting, guaranteeing a more comfortable and safer work environment. Each step of the drill bit is radially adjusted and precision ground, and the steps are laser-marked for easy identification.

This tool is suitable for sheet metal up to 4 mm thick and comes in a translucent plastic case with a hanger, ideal for storage and transport.

- **Model:** Ruko-101050-9E
