RUKO HSS 90° conical countersink long cylindrical handle Ø max. 20.5mm

Brand: Ruko

Reference: TUR 102277

The Ruko-102277 is a DIN 335 90° countersink made of HSS with a long cylindrical shank. Designed for precise cutting of non-ferrous metals, steel, and plastics, it includes a translucent plastic storage case.

[View product online](#)**Description**

The Ruko-102277 is a high-precision conical countersink, designed according to DIN 335, with a 90° countersinking angle and a long cylindrical shank. This tool is ideal for countersinking a wide variety of materials, including non-ferrous metals, steel, thermoplastics and hard plastics, as well as sheet metal up to 4 mm thick. Its innovative design includes a DIN 1412 C split point cutting point, which allows for a more efficient and precise start to the cut.

The 118° cutting angle and 20/30° taper angle, along with its three cutting edges, ensure optimal performance in diverse applications.

Thanks to CBN grinding and the chip ejection channel design, the Ruko-102277 minimizes noise, vibration, and burr formation, guaranteeing a clean and professional finish.

- Cutting point with split point DIN 1412 C
- Cutting angle: 118°
- Cone angle: 20/30°
- Right-hand cutting
- Chip ejection channel design
- CBN grinding for efficient cutting
- Suitable for non-ferrous metals, steel, and hard plastics
- Cutting capacity in sheet metal up to 4 mm
- Translucent plastic case with hanger
- Long cylindrical handle with 3 cutting edges

Specifications

High	2,55
Width	2,55
EAN	4007140126986
Manufacturer	Ruko
Weight (kg)	0,9000
Depth	12,50
