**RUKO HSS conical countersink
90° hexagonal handle 1/4" Ø
max. 6.3 mm**

Brand: Ruko

Reference: TUR 102313

DIN 335 Form C 90° countersink, made of HSS with a 1/4" hexagonal shank. Ideal for non-ferrous metals, steel, and hard plastics. Optimized design for precise, vibration-free cutting. Includes a translucent plastic case.

[View product online](#)**Description**

The Ruko-102313 is a high-precision tapered countersink, designed according to DIN 335, offering a cutting angle of 118° and a taper angle of 20/30°. Its DIN 1412 C split point cutting point allows for a more efficient and precise start, ideal for applications on various materials. Thanks to its CBN grinding and the ingenious design of the chip evacuation channels, this countersink ensures a clean cut without noise, vibration, or burrs, making it an essential tool for high-quality work.

This countersink is suitable for working with non-ferrous metals, steel, thermoplastics, and hard plastics, as well as sheet metal up to 4 mm thick.

Its 1/4" hexagonal shank allows direct connection to drills and screwdrivers equipped with a 1/4" chuck, as well as any 1/4" bit holder. It comes in a translucent plastic case with a hanger, facilitating storage and transport.

- Cutting point with split point DIN 1412 C
- Cutting angle: 118°
- Cone angle: 20/30°
- Right-hand cutting
- CBN ground for optimal cutting
- Chip ejection channel design
- Suitable for non-ferrous metals and steel
- Compatible with thermoplastics and hard plastics
- Sheet metal capacity up to 4 mm
- Translucent plastic case with hanger

Specifications

High	1,13
Width	1,13
EAN	4007140038432
Manufacturer	Ruko
Weight (kg)	0,0100
Depth	4,10
