RUKO HSS 90° conical countersink with 1/4" hexagonal handle (max. Ø 20.5 mm)

Brand: Ruko

Reference: TUR 102318

The Ruko-102318 countersink, with a 1/4" hexagonal shank, is ideal for non-ferrous metals, steel, and hard plastics. Its design ensures a precise and clean cut and is compatible with 1/4" drills and bit holders. A plastic carrying case is included.

Description

The Ruko-102318 is a high-precision tapered countersink, designed according to DIN 335, offering a 118° cutting angle and a 20/30° taper angle, ideal for countersinking a variety of materials. Its DIN 1412 C split point cutting edge allows for a more efficient start, minimizing slippage and ensuring a clean finish. Thanks to CBN grinding and the ingenious chip flute design, this countersink ensures optimal cutting, free of noise, vibration, and burrs, making it an essential tool for precision work.

The Ruko-102318 is suitable for working with non-ferrous metals, steel, thermoplastics, and hard plastics, as well as sheet metal up to 4 mm thick.

Its 1/4" hexagonal shank allows direct connection to drills and screwdrivers equipped with a 1/4" chuck, as well as any 1/4" bit holder. It comes in a translucent plastic case with a hanger, facilitating storage and transport.

- Cutting point with split point DIN 1412 C
- Cutting angle: 118°
- Cone angle: 20/30°
- Right-hand cutting
- CBN ground for efficient cutting
- Chip ejection channel design
- Suitable for non-ferrous metals and steel
- Compatible with thermoplastics and hard plastics
- Sheet metal capacity up to 4 mm
- 1/4" hexagonal shank for direct connection

Specifications

High	2,55
Width	2,55
EAN	4007140038487
Manufacturer	Ruko
Weight (kg)	0,0500
Depth	5,10
