

Product sheet

RUKO TC multi-grade core drill bit Ø 54 mm, ideal for multiple materials.

Brand: Ruko

Reference: TUR 113054

The TC multigrade MHS hole saw (Ø 54 mm) is ideal for stainless steel and non-ferrous metals. With carbide teeth and a cutting depth of 2 to 28 mm, it includes a translucent plastic storage case.

[View product online](#)**Description**

The Ruko-113054 MHS TC multi-grade hole saw is a high-precision tool designed for drilling in a wide variety of materials. With a 54 mm diameter and a cutting depth of up to 28 mm, this hole saw is ideal for working with stainless steel, high-alloy steels such as V2A and V4A, as well as steel and cast steel up to 20 mm thick. It is also suitable for non-ferrous metals and plastics up to 28 mm thick. Its right-hand cutting design and carbide teeth ensure optimal performance and a long service life.

The MHS hole saw features a triangular shank, providing a secure and stable grip during use. Hole saws with diameters from Ø 15.0 mm to 30.0 mm are supplied as a complete unit, including a pilot drill and hex key.

For diameters from Ø 31.0 mm to 100.0 mm, the crown is supplied without a shank, requiring an M18 x 6 P 1.5 threaded adapter. For sizes from 65.0 mm, the use of an MK2 Morse taper shank (item 113 203) is recommended. The entire set comes in a translucent plastic case with a hanger, making it easy to store and transport.

- Diameter: Ø 54 mm
- Cutting depth: 2 to 28 mm
- Carbide teeth
- Right-hand cutting
- Recommended for stainless steel and high-alloy steels
- Cutting capacity in steel and cast iron up to 20 mm
- Cutting capacity in non-ferrous metals and plastics up to 28 mm
- Triangular shank

- Translucent plastic case with hanger
- M18 x 6 P 1.5 thread adapter for core drills from Ø 31.0 to 100.0 mm

Specifications

High	6,00
Width	6,00
EAN	4007140085917
Manufacturer	Ruko
Weight (kg)	0,4000
Depth	12,00
