Description

The Ruko-128012-HSS-G (Ø 12 mm) hole saw is a high-precision tool designed for drilling in a wide variety of materials. With a material thickness of up to 2.5 mm and a cutting depth of 5.0 mm, this hole saw is ideal for working with alloy steels, cast steel, non-ferrous metals, light metals, plastics, reinforced fabrics, drywall, and in light construction. Its right-hand cutting design allows for optimal performance, and its resharpenable design ensures a long service life and efficiency with every use.

It is important to note that this tool is not suitable for hammer drilling. It is recommended to apply light pressure when starting to drill and maintain constant pressure throughout the process.

For best results, it is suggested to avoid oscillating movements and use coolants that facilitate cutting and prolong the tool's durability.
