Product sheet

RUKO 16mm diameter high precision HSS-G core drill bit.

Brand: Ruko

Reference: TUR 128016

The Ruko-128016 HSS-G (Ø 16 mm) core drill is ideal for alloy steels, non-ferrous metals, and plastics. With a material thickness of up to 2.5 mm and a cutting depth of 5 mm, it is resharpenable and requires minimal pressure.

Description

The Ruko-128016-HSS-G (Ø 16 mm) hole saw is a high-precision tool designed for drilling in a wide variety of materials. With a material thickness of up to 2.5 mm and a cutting depth of 5.0 mm, this hole saw offers a right-angle cut and is resharpenable, ensuring a long service life and consistent performance. Its design makes it particularly suitable for working with alloy steels up to 800 N/mm² hardness, as well as cast steel, non-ferrous metals, light metals, plastics, reinforced fabrics, plasterboard, and in light construction applications.

It is important to note that this tool is not suitable for hammer drilling. For best results, it is recommended to apply light pressure when starting to drill, maintaining constant pressure and avoiding oscillating movements.

In addition, the use of coolant is advisable to optimize the drilling process and extend the tool's lifespan.

- **Diameter:** 16 mm
- **Material thickness:** up to 2.5 mm
- **Cutting depth:** 5.0 mm
- **Cutting:** right-hand
- **Resharpenable:** yes
- **Recommended materials:** alloy steels, cast steel, non-ferrous metals, light metals, plastics, reinforced fabrics, plasterboard
- **Applications:** light construction
- **Drilling pressure:** low and constant
- **Movements:** avoid oscillations

- **Use of coolant:** recommended

Specifications

High	3,00
Width	3,00
EAN	4007140294715
Manufacturer	Ruko
Weight (kg)	0,0600
Depth	12,00
