Product sheet

# RUKO 25mm diameter high precision HSS-G core drill bit.

Brand: Ruko

Reference: TUR 128025

The Ruko-128025 HSS-G (Ø 25 mm) core drill is ideal for alloy steels, non-ferrous metals, and plastics. With a material thickness of up to 2.5 mm and a cutting depth of 5 mm, it is resharpenable and requires minimal pressure.

## Description

The Ruko-128025 hole saw is designed to deliver exceptional performance in a variety of materials. With a 25 mm diameter, this tool is ideal for drilling alloy steels up to 800 N/mm² hardness, as well as cast steel, non-ferrous metals, light metals, plastics, reinforced fabrics, plasterboard, and in light construction applications. Its design allows for a cutting depth of 5.0 mm and it can work with materials up to 2.5 mm thick. The hole saw features a right-hand cutting edge and is resharpenable, ensuring a long service life and efficient operation.

It is important to note that this tool is not suitable for hammer drilling. It is recommended to apply light pressure when starting to drill, maintaining constant pressure throughout the process.

For best results, avoid any oscillating movement and use coolant to help maintain the proper temperature during use.

- **Diameter:** 25 mm
- **Material Thickness:** Up to 2.5 mm
- **Cutting Depth:** 5.0 mm
- **Cutting:** Right-handed
- **Resharpenable:** Yes
- **Recommended Materials:** Alloy steels, cast steel, non-ferrous metals, light metals, plastics, reinforced fabrics, drywall
- **Applications:** Light construction
- **Drilling Pressure:** Low and constant
- **Movement:** Avoid oscillations

- **Use of refrigerants:**Recommended

## Specifications

| | |
|---|---|
| High | 4,00 |
| Width | 4,00 |
| EAN | 4007140294807 |
| Manufacturer | Ruko |
| Weight (kg) | 0,1000 |
| Depth | 12,00 |
