Product sheet

RUKO 35mm diameter high precision HSS-G core drill bit.

Brand: Ruko

Reference: TUR 128035

The Ruko-128035 HSS-G (Ø 35 mm) core drill is ideal for alloy steels, non-ferrous metals, and plastics. With a material thickness of up to 2.5 mm and a cutting depth of 5 mm, it is resharpenable and requires minimal pressure.

Description

The Ruko-128035 hole saw is designed to deliver exceptional performance in a variety of materials. With a 35 mm diameter, this tool is ideal for drilling alloy steels, cast steel, non-ferrous metals, light metals, plastics, reinforced fabrics, plasterboard, and in light construction applications. Its design allows for a cutting depth of 5.0 mm and it can handle materials up to 2.5 mm thick. The hole saw features a right-hand cutting edge and is resharpenable, ensuring a long service life and consistent performance.

It is important to note that this tool is not suitable for hammer drilling. For best results, it is recommended to apply light pressure when starting to drill and maintain constant pressure throughout the process.

Additionally, any oscillating movement should be avoided, and coolant should be used to optimize performance and extend the tool's life.

- **Diameter:** 35 mm
- **Material Thickness:** Up to 2.5 mm
- **Cutting Depth:** 5.0 mm
- **Cutting:** Right-handed
- **Resharpenable:** Yes
- **Recommended Materials:** Alloy steels, cast steel, non-ferrous metals, light metals, plastics, reinforced fabrics, plasterboard
- **Applications:** Light construction
- **Drilling Pressure:** Low and constant
- **Movements:** Avoid oscillations

- **Use of coolant refrigerants:**Recommended

Specifications

High	5,00
Width	5,00
EAN	4007140294906
Manufacturer	Ruko
Weight (kg)	0,1400
Depth	12,00
