Description

The Ruko-128049-HSS-G (Ø 49 mm) hole saw is a high-precision tool designed to deliver exceptional performance in a variety of materials. With a material thickness of up to 2.5 mm and a cutting depth of 5.0 mm, this hole saw is ideal for working with alloy steels, cast steel, non-ferrous metals, light metals, plastics, reinforced fabrics, drywall, and light construction materials. Its right-hand cutting design allows for efficient and precise drilling, while its resharpenable design ensures a long service life and consistent performance.

It is important to note that this tool is not suitable for hammer drilling. It is recommended to apply light pressure when starting to drill and maintain constant pressure throughout the process.

For best results, it is suggested to avoid oscillating movements and use coolants that facilitate cutting and prolong the tool's life.
