Description

The Ruko-126083 hole saw is designed to deliver exceptional performance when cutting demanding materials. With a diameter of 83 mm and a maximum cutting depth of 38 mm, this tool is ideal for working with alloy and non-alloy steels up to 1,000 N/mm², as well as stainless steels and non-ferrous metals. Its special steel construction and HSS Co 8 cutting teeth ensure superior durability and precision, while its fine teeth allow for clean and efficient cuts. It is important to use the core drill with coolant and follow the revolutions per minute (rpm) chart included in the box to optimize its performance.
