

Product sheet

RUKO 10.5mm helical drill bits, HSS-Co 5 cobalt, DIN 338, self-centering.

Brand: Ruko

Reference: TUR 229105

Pack of 5 DIN 338 TL 3000 HSS-Co 5 Cobalt twist drill bits, Ø 10.5 mm. Made of high-performance high-speed steel, ideal for drilling medium and hard chipping materials. They feature a conical tip and are suitable for various drilling depths.

Description

The Ruko-229105 twist drill bit is a high-precision tool designed to meet the demands of drilling in medium-chipping, long, and difficult materials. Made of high-performance high-speed steel and cobalt alloy, this drill bit offers superior resistance to heat set, making it ideal for jobs requiring significant drilling depths. Its design includes a tapered point grinding with a split point, conforming to DIN 1412 C, which ensures a precise and efficient start to the drilling process. With a 130° cutting angle and a 40° spiral angle, this drill bit guarantees optimal performance on a wide variety of materials, including alloy and non-alloy steels, titanium, cast iron, and more.

- **Diameter:** Ø 10.5 mm
- **Material:** HSS-Co high-speed steel with cobalt
- **Tensile Strength:** Up to 1200 N/mm²
- **Cutting Angle:** 130°
- **Spiral Angle:** 40°
- **Tolerance:** h8
- **Surface Finish:** Golden Brown
- **Cutting:** Right-handed
- **Applications:** Steel, titanium, aluminum, copper, among others
- **Presentation:** Translucent plastic case with red background label

Specifications

High	4,00
Width	4,00
EAN	4007140066817
Manufacturer	Ruko

Weight (kg)	0,3000
Depth	14,00
