

## Product sheet

## RUKO drill bit for welding spots Ø 7 mm, high precision and durability.

Brand: Ruko

Reference: TUR 101111TC

Ruko-101111TC drill bit for spot welding, with a diameter of 7 mm. Designed for drilling steel, aluminum, brass, zinc, copper and plastic sheets, offering precision and efficiency in welding and drilling work on various materials.

### Description

The Ruko-101111TC drill bit is specifically designed for spot welding in a wide variety of materials, including steel sheets, aluminum, brass, zinc, copper, and plastic. Its 7 mm diameter allows for precise and clean holes, facilitating the welding process and ensuring a strong and durable joint. Made with high-quality materials, this drill bit guarantees a long lifespan and optimal performance in industrial and DIY applications.

- **Diameter:** 7 mm
- **Compatible Materials:** Steel, aluminum, brass, zinc, copper, and plastic
- **Drill Type:** Spot welding drill bit
- **Use:** Ideal for precise drilling in sheet metal
- **Durability:** High strength and long lifespan
- **Applications:** Industrial and DIY
- **Design:** Efficient for easy welding
- **Compatibility:** Compatible with standard drills
- **Finish:** Provides clean, burr-free holes
- **Manufacturer:** Ruko

### Specifications

|              |               |
|--------------|---------------|
| High         | 2,50          |
| Width        | 2,50          |
| EAN          | 4007140127037 |
| Manufacturer | Ruko          |
| Weight (kg)  | 0,0200        |
| Depth        | 8,50          |
