

Product sheet

RUKO Ø 8.0 mm welding spot bit, high precision and durability.

Brand: Ruko

Reference: TUR 101081

Ruko-101081 spot welding bit, with a diameter of 8.0 mm. Designed for connection to pneumatic machines, it offers high precision in use, ideal for applications that require a high level of detail and accuracy in welding.

Description

The Ruko-101081-Bit for spot welding (Ø 8.0 (v) mm) is a high-precision tool specifically designed for use in pneumatic welding machines. This bit stands out for its ability to perform welds efficiently and effectively, guaranteeing quality results in industrial and manufacturing applications. Its optimized design allows for a secure and stable connection, contributing to superior performance in welding tasks. The precision of the Ruko-101081-Bit ensures that each weld point is performed accurately, minimizing the risk of errors and improving work productivity.

- **Diameter:** Ø 8.0 mm
- **Connection Type:** Compatible with pneumatic machines
- **Precision:** High welding precision
- **Material:** Made of high-quality materials
- **Durability:** Resistant to wear and prolonged use
- **Applications:** Ideal for industrial and manufacturing work
- **Ease of Use:** Intuitive design for quick installation
- **Compatibility:** Compatible with various brands of pneumatic machines
- **Performance:** Improves efficiency in welding processes
- **Quality Control:** Manufactured under strict quality standards

Specifications

High	2,50
Width	2,50
EAN	4007140033413
Manufacturer	Ruko
Weight (kg)	0,0200

Depth	8,50
