

Product sheet

RUKO cylindrical carbide end mills Ø 6 mm without front teeth for precision.

Brand: Ruko

Reference: TUR 116010

Ruko-116010 carbide end mill, A-ZYA cylindrical shape (Ø 6 mm) without face teeth. Ideal for deburring, surface finishing, and removing weld beads on high-alloy steels and plastics. Packaged in an individual plastic box.

Description

The Ruko-116010-A-ZYA form carbide end mill, cylindrical without face teeth (Ø 6 mm), is a high-precision tool designed to meet the demands of professionals in the metalworking and manufacturing sectors. Featuring fine KZ4 cross teeth, this end mill offers high cutting power combined with remarkable toughness, making it an ideal choice for various industrial applications.

The cross teeth provide greater cutting capacity compared to single teeth, allowing for tasks such as deburring, surface and angle finishing, and weld bead removal.

Its versatility makes it suitable for working with demanding materials, including high-alloy steels, corrosion-resistant steels, plastics, and castings.

- **Miller diameter:** 6 mm
- **Tooth type:** KZ4 - fine
- **Surface:** Bright
- **Material:** Carbide
- **Applications:** Deburring, chamfering, surface and angle finishing
- **Use on:** High-alloy steels, corrosion-resistant steels, plastics, and castings
- **Packaging:** Individual plastic box with hanger
- **Durability:** High toughness
- **Applications:** Weld bead removal

The Ruko-116010 is an essential tool for those seeking precision and efficiency in their machining work.

Specifications

High	1,50
Width	1,50
EAN	4007140090706
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0200
Depth	9,50
