RUKO cylindrical carbide end mills Ø 10 mm without front teeth.

Brand: Ruko

Reference: TUR 116012

Ruko-116012 carbide end mill, A-ZYA cylindrical shape (Ø 10 mm) without face teeth. Ideal for deburring, surface finishing, and removing weld beads on high-alloy steels and plastics. Packaged in an individual plastic box.

Description

The Ruko-116012 is a high-precision carbide end mill designed to deliver exceptional performance in a variety of industrial applications. With a 10 mm diameter and a robust shank, this tool features a fine KZ4 cross-cut design that combines high cutting power with remarkable toughness. This cross-cut design provides greater cutting capacity compared to single-cut designs, making it an ideal choice for demanding tasks.

The Ruko-116012 is particularly effective for deburring, edge trimming, surface and angle finishing, and weld bead removal.

Its versatility makes it suitable for use on high-alloy steels, corrosion-resistant steels, materials exposed to acids and heat, as well as castings and plastics.

- **Type:** Cylindrical carbide end mill
- **Diameter:** 10 mm
- **Toothing:** KZ4 - fine
- **Surface:** Bright
- **Applications:** Deburring, surface finishing, weld bead removal
- **Compatible materials:** High-alloy steels, corrosion-resistant steels, plastics
- **Packaging:** Individual plastic box with hanger
- **Toughness:** High
- **Cutting capacity:** High capacity

The Ruko-116012 is an essential tool for professionals seeking precision and durability in their

machining work.

Specifications

High	1,50
Width	1,50
EAN	4007140090720
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0400
Depth	9,50
