RUKO carbide end mills, cylindrical Ø 12 mm, without front teeth

Brand: Ruko

Reference: TUR 116013

Ruko-116013 carbide end mill, A-ZYA cylindrical shape (Ø 12 mm) without face teeth. Ideal for deburring, surface finishing, and removing weld beads on high-alloy steels and plastics. Packaged in an individual plastic box.

Description

The Ruko-116013 is a cylindrical carbide end mill designed to deliver exceptional performance in a variety of industrial applications. With a 12 mm diameter, this tool features a robust shank and fine KZ4 cross-cut teeth, providing high cutting power and toughness. Its innovative design allows for greater cutting capacity compared to single-cut teeth, making it an ideal choice for demanding tasks.

Applications for this end mill include deburring, edge trimming, surface and angle finishing, and weld bead removal.

It is especially effective on materials such as high-alloy steels, corrosion-resistant steels, plastics, cast iron, and metals exposed to acidic and heat conditions.

- **Type:** Cylindrical carbide end mill
- **Diameter:** 12 mm
- **Tooth:** KZ4 - fine
- **Surface:** Bright
- **Applications:** Deburring, chamfering, surface and angle finishing
- **Compatible materials:** High-alloy steels, corrosion-resistant steels, plastics, cast iron
- **Strength:** High toughness and cutting capacity
- **Packaging:** Individual plastic box with hanger
- **Use:** Industrial and professional

The Ruko-116013 is an essential tool for those seeking precision and durability in their machining work.

Specifications

High	2,00
Width	2,00
EAN	4007140090737
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0500
Depth	10,00
