

Product sheet

RUKO carbide milling cutters, cylindrical Ø 8 mm with front teeth for precision.

Brand: Ruko

Reference: TUR 116016

Ruko-116016 carbide end mill, A-ZYA cylindrical shape with face teeth (Ø 8 mm). Ideal for deburring, surface finishing, and removing weld beads on high-alloy steels and plastics. Packaged in an individual plastic box.

Description

The Ruko-116016 is a cylindrical carbide end mill with an 8 mm diameter, designed to deliver exceptional performance in a variety of industrial applications. Its fine KZ4 cross-cutting provides high cutting power combined with high toughness, making it an ideal tool for jobs requiring precision and efficiency. This type of toothing allows for greater cutting capacity compared to single-cutting, optimizing the machining process.

This end mill is particularly suitable for deburring, chamfering edges, adjusting surfaces and angles, as well as removing weld beads.

Its versatility makes it suitable for use on high-alloy steels, corrosion-resistant, acid-resistant, and heat-resistant steels, as well as cast irons and plastics.

- **Type:** Cylindrical carbide end mill
- **Diameter:** 8 mm
- **Toothing:** KZ4 - fine
- **Surface:** Bright
- **Applications:** Deburring, chamfering, surface and angle finishing
- **Compatible materials:** High-alloy steels, corrosion-resistant steels, plastics
- **Packaging:** Individual plastic box with hanger
- **Durability:** High toughness
- **Use:** Industrial and professional

Specifications

High	1,50
Width	1,50
EAN	4007140090379
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0300
Depth	9,50
