

Product sheet

RUKO carbide milling cutters, cylindrical Ø 12 mm with front teeth for precision.

Brand: Ruko

Reference: TUR 116018

Ruko-116018 carbide cylindrical end mill with fine KZ4 face teeth (Ø 12 mm). Ideal for deburring, surface finishing, and weld bead removal on high-alloy steels, plastics, and more. Packaged in an individual plastic box.

Description

The Ruko-116018 is a high-precision carbide end mill designed to deliver exceptional performance in a variety of industrial applications. With a 12 mm diameter and a robust shank, this tool is equipped with fine KZ4 cross teeth, providing high cutting power and toughness. Its innovative design allows for greater cutting capacity compared to single-toothed edges, making it an ideal choice for demanding tasks.

This end mill is perfect for deburring, chamfering edges, adjusting surfaces and angles, as well as removing weld beads.

Its versatility makes it suitable for working with high-alloy steels, corrosion-resistant steels, materials exposed to acids and heat, as well as castings and plastics.

- **Type:** Cylindrical carbide end mill
- **Diameter:** 12 mm
- **Toothing:** KZ4 - fine
- **Surface:** Bright
- **Applications:** Deburring, surface finishing, weld removal
- **Compatible materials:** High-alloy steels, corrosion-resistant steels, plastics
- **Packaging:** Individual plastic case with hanger
- **Durability:** High toughness and wear resistance
- **Use:** Professional and industrial
- **Manufacturer:** Ruko

Specifications

High	2,00
Width	2,00
EAN	4007140090362
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0500
Depth	10,00
