

Product sheet

RUKO semi-spherical carbide end mills Ø 8 mm for precision cutting.

Brand: Ruko

Reference: TUR 116021

Ruko-116021 carbide end mills, C-WRC semi-spherical shape (Ø 8 mm) with fine KZ4 cross teeth. Ideal for deburring, surface finishing, and weld bead removal on high-alloy steels, plastics, and more. Packaged in a plastic case.

Description

The Ruko-116021-C-WRC Semi-Spherical Carbide End Mill (Ø 8 mm) is a high-precision tool designed to meet the demands of professionals in the machining and manufacturing fields. Featuring a fine KZ4 cross-cut design, this end mill offers high cutting power and remarkable toughness, making it an ideal choice for various industrial applications.

The cross-cut design provides greater cutting capacity compared to single-cut design, enabling superior performance in tasks such as deburring, surface and angle finishing, and weld bead removal.

It is especially effective on challenging materials, including high-alloy steels, corrosion-resistant, acid-resistant, and heat-resistant steels, as well as cast irons and plastics.

The milling cutter has a bright surface that facilitates its use and maintenance, and comes in a practical individual plastic case with a hanger, ensuring its protection and easy storage.

- **Type:** Semi-spherical carbide milling cutter
- **Diameter:** Ø 8 mm
- **Toothing:** KZ4 - fine
- **Surface:** Bright
- **Applications:** Deburring, chamfering, surface and angle finishing
- **Compatible materials:** High-alloy steels, corrosion-resistant, acid-resistant, and heat-resistant steels, cast iron, and plastics
- **Presentation:** Individual plastic box with hanger
- **Durability:** High toughness

- **Cutting capacity:** Superior to single serrations

Specifications

High	1,50
Width	1,50
EAN	4007140090416
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0300
Depth	9,50
