

Product sheet

**RUKO carbide end mills, full arc
Ø 10 mm, for precision cutting.**

Brand: Ruko

Reference: TUR 116032

Ruko-116032 carbide end mill with RBF shape, full arc (Ø 10 mm). Designed for deburring, surface finishing, and weld bead removal on high-alloy steels and plastics. Features fine KZ4 cross teeth and comes in a plastic case.

[View product online](#)**Description**

The Ruko-116032 RBF Full Arc Solid Carbide End Mills (Ø 10 mm) are high-precision tools designed to deliver exceptional performance in a variety of industrial applications. Featuring a fine KZ4 cross-cut design, these end mills combine high cutting power with remarkable toughness, making them an ideal choice for demanding work. The cross-cut design provides greater cutting capacity compared to single-cut, allowing for a more efficient and cleaner finish.

These end mills are particularly suitable for deburring, chamfering edges, adjusting surfaces and angles, as well as removing weld beads.

Their versatility makes them suitable for use on high-alloy steels, corrosion-resistant, acid-resistant, and heat-resistant steels, as well as cast irons and plastics.

- **Diameter:** 10 mm
- **Material:** Carbide
- **Tooth:** KZ4 - fine
- **Surface:** Bright
- **Applications:** Deburring, surface finishing, weld removal
- **Compatibility:** High-alloy steels, plastics, cast irons
- **Packaging:** Individual plastic box with hanger
- **Durability:** High toughness
- **Cutting type:** Crosscut
- **Use:** Industrial and professional

Specifications

High	1,50
Width	1,50
EAN	4007140090393
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0400
Depth	9,50
