

Product sheet

RUKO carbide end mills with pointed cone (Ø 6 mm) for precision machining.

Brand: Ruko

Reference: TUR 116035

Ruko-116035 carbide end mills with a pointed cone shape (Ø 6 mm). Fine KZ4 cross-cut teeth, ideal for deburring, surface finishing, and weld bead removal on high-alloy steels, plastics, and more. Packaged in a plastic case.

Description

The Ruko-116035-M-SKM Conical Tip End Mill (Ø 6 mm) is a high-precision tool designed to meet the demands of professionals in the machining and manufacturing fields. Featuring a fine KZ4 cross-cut design, this end mill offers high cutting power combined with remarkable toughness, making it an ideal choice for various industrial applications.

The cross-cut design provides greater cutting capacity compared to single-cut designs, enabling superior performance in tasks such as deburring, surface and angle finishing, and weld bead removal.

Its versatility makes it suitable for working with demanding materials, including high-alloy steels, corrosion-resistant steels, plastics, and castings.

- **Miller diameter:** 6 mm
- **Tooth type:** KZ4 - fine
- **Surface:** Bright
- **Material:** Carbide
- **Applications:** Deburring, chamfering, surface and angle finishing
- **Use on:** High-alloy steels, corrosion-resistant steels, plastics, and castings
- **Packaging:** Individual plastic box with hanger
- **Durability:** High toughness
- **Applications:** Weld bead removal

The Ruko-116035 is an essential tool for those seeking precision and efficiency in their machining work.

Specifications

High	1,50
Width	1,50
EAN	4007140090843
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0200
Depth	9,50
