

Product sheet

RUKO TiCN cylindrical carbide end mills Ø 10 mm with face teeth.

Brand: Ruko

Reference: TUR 116017TC

Cylindrical carbide end mill (Ø 10 mm) with fine KZ4 face teeth. Ideal for deburring, surface finishing, and weld bead removal on high-alloy steels and plastics. Packaged in an individual plastic box.

Description

The Ruko-116017TC is a carbide milling cutter designed to deliver exceptional performance in a variety of industrial applications. With a cylindrical shank and a 10 mm diameter, this tool features fine KZ4 cross-cutting, which provides high cutting power and toughness. Its innovative design allows for greater cutting capacity compared to single-cutting cutters, making it an ideal choice for demanding tasks.

This milling cutter is particularly well-suited for deburring, chamfering edges, adjusting surfaces and angles, and removing weld beads.

Its versatility makes it suitable for working with high-alloy steels, corrosion-resistant steels, materials exposed to acids and heat, as well as castings and plastics.

- **Type:** Carbide end mill with cylindrical shank
- **Diameter:** 10 mm
- **Toothing:** KZ4 fine
- **Surface:** TiCN
- **Applications:** Deburring, surface finishing, weld bead removal
- **Compatible materials:** High-alloy steels, corrosion-resistant steels, plastics
- **Strength:** High toughness and cutting capacity
- **Packaging:** Individual plastic case with hanger

The Ruko-116017TC is an essential tool for professionals seeking precision and durability in their machining work.

Specifications

High	1,50
Width	1,50
EAN	4007140120274
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0400
Depth	9,50
