Description

The Ruko-116019TC is a solid carbide end mill designed to deliver exceptional performance in a variety of industrial applications. With a 16 mm diameter and a robust shank, this tool features fine KZ4 cross teeth that provide high cutting power and toughness. Its advanced design allows for greater cutting capacity compared to single-toothed cutters, making it an ideal choice for demanding tasks.

This end mill is particularly suitable for deburring, chamfering edges, adjusting surfaces and angles, as well as removing weld beads.

Its versatility makes it suitable for working with materials such as high-alloy steels, corrosion-resistant steels, plastics, and castings, guaranteeing precise and efficient results.
