

Product sheet

RUKO TiCN carbide burs shape G-SPG Ø 8 mm for precise cutting.

Brand: Ruko

Reference: TUR 116026TC

TiCN carbide end mill with G-SPG shape and 8 mm diameter. Designed for deburring, surface finishing, and weld bead removal on high-alloy steels and plastics. Packaged in an individual plastic box with a hanger.

Description

The Ruko-116026TC is a solid carbide end mill designed to deliver exceptional performance in a variety of industrial applications. With an 8 mm diameter and a robust shank, this tool features fine KZ4 cross teeth that provide high cutting power and toughness. Its innovative design allows for greater cutting capacity compared to single-toothed cutters, making it an ideal choice for demanding tasks.

This end mill is particularly effective in deburring, surface and angle finishing, and weld bead removal. Its versatility makes it suitable for working with materials such as high-alloy steels, corrosion-resistant steels, plastics, and castings.

The surface treated with TiCN (Titanium Carbon Nitride) improves durability and wear resistance, ensuring prolonged performance under demanding working conditions.

- **Type:** Solid carbide end mill with shank
- **Diameter:** 8 mm
- **Tooth:** KZ4 - fine
- **Surface:** TiCN
- **Applications:** Deburring, chamfering, surface and angle finishing
- **Compatible materials:** High alloy steels, corrosion-resistant steels, plastics, cast iron
- **Cutting capacity:** High, thanks to the cross-tooth pattern
- **Packaging:** Individual plastic case with hanger
- **Durability:** High, with treatment TiCN

Specifications

High	1,50
Width	1,50
EAN	4007140136336
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0300
Depth	9,50
