The Ruko-246080UNC tap set is designed for creating through and blind hole threads in a variety of materials, including unalloyed and low-alloy steels with a tensile strength of up to 800 N/mm², as well as malleable cast iron and non-ferrous metals. This set of three taps allows for an efficient and precise threading process, as it consists of three stages: roughing, intermediate, and finishing. The resulting thread is an American UNC type, characterized by its coarse thread and a 2B tolerance, guaranteeing a proper fit in industrial applications.
