Description

The Ruko-246034UNC tap set is designed for creating through threads and blind holes in a variety of materials, including unalloyed and low-alloy steels with a tensile strength of up to 800 N/mm², as well as malleable cast iron and non-ferrous metals. This tap set enables an efficient and precise threading process, as the thread is tapped in three stages: roughing, intermediate, and finishing, ensuring optimal results in every application.

The UNC (Unified National Coarse) thread features a coarse thread design, with a 2B tolerance and a bright surface that facilitates sliding during the cutting process.

This set includes three pieces, each specifically designed to perform a function in the threading process, thus ensuring the quality and durability of the threads created.

- **Thread Type:** American UNC, Coarse Thread
- **Tolerance:** 2B
- **Compatible Materials:** Unalloyed steels, low-alloy steels, malleable cast iron, non-ferrous metals
- **Maximum Strength:** 800 N/mm²
- **Threading Process:** 3 steps (rough, intermediate, finishing)
- **Surface:** Bright
- **Cut:** Right-handed
- **Packaging:** Plastic box with hanger
- **Use:** Ideal for industrial and DIY

Specifications

EAN	4007140100283
Manufacturer	Ruko
Weight (kg)	0,4000
