

Product sheet

RUKO HSS ground progressive thread tap M10, DIN 352, high precision.

Brand: Ruko

Reference: TUR 231100

The Ruko-231100 is an M10 progressive thread tap, made of ground HSS. Ideal for through threads in unalloyed steels and non-ferrous metals. Packaged in an individual plastic case, it allows for right-hand cutting.

Description

The Ruko-231100 is a progressive thread tap designed for creating through threads in a variety of materials, including unalloyed and low-alloy steels with a tensile strength of up to 800 N/mm², as well as malleable cast iron and non-ferrous metals. This tap allows for single-step thread tapping, either manually or using machines, making it a versatile and efficient tool for machining operations.

- **Thread Type:** Metric DIN ISO 13
- **Tolerance:** ISO 2/6H
- **Surface Finish:** Bright
- **Cut:** Right-handed
- **Compatible Materials:** Unalloyed steels, low-alloy steels, malleable cast iron, and non-ferrous metals
- **Maximum Tensile Strength:** 800 N/mm²
- **Use:** Single-step tapping, manual or mechanical
- **Presentation:** 1 piece per unit
- **Packaging:** Individual plastic case with hanger
- **Applications:** Ideal for threading work in various industrial sectors

The Ruko-231100 is an essential tool for professionals seeking precision and durability in their machining projects.

Specifications

High	1,30
Width	1,50
EAN	4007140024305
Manufacturer	Ruko
Weight (kg)	0,0300
Depth	9,40
