Description

The Ruko-233220 tap is a high-precision tool designed for creating threads in blind holes. Made from high-speed steel (HSS) and ground, this tap ensures efficient and long-lasting cutting. Its reinforced shank and 35° spiral flutes allow for optimal chip removal, facilitating work with materials such as unalloyed steels, low-alloy steels with a tensile strength of up to 800 N/mm², malleable cast iron, and non-ferrous metals. This tap is designed to perform thread cutting in a single step, optimizing working time and improving the quality of the finish.
