Description

The Ruko-263058E tap is a high-precision tool designed for creating threads in blind holes. Made of cobalt alloy high-speed steel, this tap offers exceptional heat resistance, ensuring a long service life even under demanding working conditions. Its reinforced shank and 35° spiral flutes allow for efficient and precise cutting, facilitating the threading process in a wide variety of materials.

This tap is ideal for working with unalloyed and alloy steels with a tensile strength of up to 900 N/mm², as well as malleable cast iron and non-ferrous metals. The thread is cut in a single step, ensuring a high-quality finish.

Its design complies with BSP and DIN ISO 228 standards, with an ISO 2/6H tolerance, making it a reliable choice for industrial applications.
