Description

The Ruko-232060T tap is a high-precision tool designed for creating through threads in a variety of materials, including unalloyed and alloyed steels with a tensile strength of up to 1000 N/mm², as well as V2A, malleable cast iron, and non-ferrous metals. This tap features a reinforced shank that ensures greater durability and strength during use in machinery. The thread is cut in a single step, optimizing the machining process and improving production efficiency.

- **Type:** Machine tap
- **Model:** Ruko-232060T
- **Thread:** Metric DIN ISO 13
- **Tolerance:** ISO 2/6H
- **Surface:** Titanium coated
- **Cutting:** Right-handed
- **Cutting speeds:** From 10 m/min
- **Applications:** Non-alloy steels, alloy steels, V2A, malleable cast iron, and non-ferrous metals
- **Contents:** 1 piece
- **Presentation:** Individual plastic box with hanger

This tap is an essential tool for professionals seeking precision and quality in their machining work.

Specifications

High	1,00
Width	3,00
EAN	4007140097262
Manufacturer	Ruko

Weight (kg)	0,0200
Depth	12,00
