### Description

The Ruko-272240 tap is a high-precision tool designed for creating through threads in a variety of soft materials. Manufactured with a reinforced shank, this tap is ideal for machine use, ensuring optimal and long-lasting performance. Its design allows for single-step threading, simplifying the machining process and ensuring consistent, high-quality results.

This tap is especially suitable for working with aluminum, aluminum alloys, bronze, copper, nickel, and plastics, making it a versatile tool for various industrial and DIY applications.

The thread complies with the DIN ISO 13 metric standard, with a tolerance of ISO 2/6H, ensuring a precise and reliable fit.
