RUKO HSSE-Co 5 nitrided VAP ground type D M5 thread profiler

Brand: Ruko

Reference: TUR 271005N

The Ruko-271005N thread profiler is designed for alloy steels and non-ferrous metals. It offers consistent accuracy in long production runs, with DIN ISO 13 metric threads and ISO 2/6H tolerance. Presented in an individual plastic case.

Description

The Ruko-271005N thread profiler is a high-precision tool designed for creating threads in alloy and non-alloy steels, as well as non-ferrous metals, with a tensile strength of up to 700 N/nm². This profiler stands out for its ability to generate threads without cutting, minimizing chip formation and ensuring a cleaner and more efficient machining process. Its design allows for consistent accuracy, even in long production runs, making it an ideal choice for demanding industrial applications.

The Ruko-271005N complies with DIN ISO 13 metric thread standards and features an ISO 2/6H tolerance, ensuring a perfect fit every time. Its nitrided surface provides increased durability and wear resistance, while the right-hand cutting facilitates its use in a variety of applications.

This profiler comes in a practical individual plastic box with a hanger, allowing for safe and accessible storage.

- Applicable to alloy and non-alloy steels up to 700 N/nm²
- Compatible with non-ferrous metals
- Thread obtained without cutting, avoiding chips
- Consistent precision in series production
- Metric thread according to DIN ISO 13
- ISO 2/6H tolerance
- Nitrided surface for greater durability
- Right-hand cutting
- Individually packaged in a plastic box
- Includes hanger for easy storage

Specifications

High	1,00
Width	3,00
EAN	4007140128980
Manufacturer	Ruko
Weight (kg)	0,0100
Depth	9,50
