Product sheet

RUKO HSS combination machine tap, M4 thread, precision ground.

Brand: Ruko

Reference: TUR 270015

The Ruko-270015 is a combination HSS tap designed for drilling, tapping, cleaning, and countersinking in a single operation. Compatible with steels and non-ferrous metals, it features a 1/4" hex shank and comes in an individual plastic case.

Description

The Ruko-270015 is a combination HSS tap designed for machine tools, allowing multiple operations to be performed with a single tool. This product is ideal for users who require efficiency and precision when working with metals. Its design allows for drilling, tapping, cleaning, and countersinking, making it a versatile solution for various industrial applications.

This tap is suitable for working with unalloyed and alloy steels with a tensile strength of up to 600 N/mm², as well as malleable cast iron and non-ferrous metals. The thread conforms to the DIN ISO 13 metric standard, with a tolerance of ISO 2/6H, guaranteeing a high-quality finish.

Its bright surface and right-hand cutting edge ensure optimal performance during use.

- **Material:** HSS (High-Speed Steel)
- **Applications:** Drilling, tapping, cleaning, and countersinking
- **Compatibility:** Unalloyed and alloy steels up to 600 N/mm²
- **Standard:** Metric thread DIN ISO 13
- **Tolerance:** ISO 2/6H
- **Surface:** Bright
- **Cut:** Right-hand
- **Head:** 1/4" Hex
- **Adaptability:** Compatible with magnetic bit holders (see WITTE 26006)
- **Presentation:** Individual plastic box with hanger

Specifications

High	1,00
Width	1,00
EAN	4007140108296
Manufacturer	Ruko
Weight (kg)	0,0100
Depth	10,80
