Product sheet

RUKO HSS combination machine tap, M10 thread, ground.

Brand: Ruko

Reference: TUR 270019

Ruko-270019 HSS combination tap for machines, ideal for drilling, tapping, cleaning, and countersinking in a single operation. Compatible with steels, cast iron, and non-ferrous metals. Metric thread DIN ISO 13, tolerance ISO 2/6H. 1/4" hex head.

Description

The Ruko-270019 is a combination HSS tap designed for machine tools, allowing multiple operations to be performed with a single tool. This product is ideal for users seeking efficiency and precision when working with materials such as unalloyed steels, alloy steels up to a tensile strength of 600 N/mm², malleable cast iron, and non-ferrous metals. Its innovative design facilitates drilling, tapping, cleaning, and countersinking, thus optimizing time and resources in the machining process.

The thread conforms to the DIN ISO 13 metric standard, with a tolerance of ISO 2/6H, ensuring a precise and high-quality fit. The tap's bright surface ensures reduced friction during use, while the right-hand cutting edge provides efficient tapping performance.

Furthermore, its 1/4" hexagonal head is compatible with magnetic bit holders, such as the WITTE 26006 model, expanding its versatility in various applications. The product comes in a practical individual plastic case with a hanger, facilitating storage and transport.

- Material: HSS (High-Speed Steel)
- Thread: Metric DIN ISO 13
- Tolerance: ISO 2/6H
- Surface: Bright
- Cutting: Right-hand
- Tensile Strength: Up to 600 N/mm²
- Compatible with magnetic bit holders
- Packaging: Individual plastic case
- Uses: Drilling, tapping, cleaning, and countersinking

- Applications: Steels, malleable cast iron, and non-ferrous metals

Specifications

High	10,00
Width	10,00
EAN	4007140108333
Manufacturer	Ruko
Weight (kg)	0,0100
Depth	10,00
