The Ruko-239051 round bearing is a high-precision solution designed for applications in unalloyed and low-alloy steels, with a maximum tensile strength of 800 N/mm², as well as in non-ferrous metals. This component features a fine metric thread, which is tapped in a single step, ensuring efficient and secure installation. Its bright surface not only provides an aesthetic finish but also contributes to the product's durability. The right-hand cut ensures a proper fit in various industrial applications.
