The Ruko-267634 hexagonal bearing is an essential tool for repairing threads on sanitary cylindrical pipes. Designed for optimal performance, this bearing is compatible with alloy and non-alloy steels with a tensile strength of up to 800 N/mm², as well as non-ferrous metals. Its enclosed Type B design ensures a secure and efficient grip, while its thread conforming to DIN ISO 228 "G" guarantees universal compatibility in industrial and plumbing applications.

The bearing's bright finish not only provides a professional appearance but also contributes to the product's durability and corrosion resistance.

With a right-hand cut, this hexagonal bearing facilitates intuitive and effective use in various repair and maintenance tasks.
