Description

The Ruko-107010 Universal Handle A for the Unigrat system deburring tool is a versatile and functional tool designed to offer optimal performance in deburring parts. Its adaptability to supports B, C, D, E, and F allows its use in a wide variety of applications, facilitating work in different environments. This handle features a knurled ring that allows the supports to be moved up to 100 mm, providing the necessary flexibility to fix the tool in any desired position. Furthermore, its ingenious design includes a compartment for storing replacement blades, easily accessed by unscrewing the end of the handle, ensuring you always have the necessary tools for efficient work at hand.
