**RUKO percussion drill bit,
carbide tip, 8 x 200 mm, high
durability and precision.**

Brand: Ruko

Reference: TUR 210080

Ruko-210080 8 x 200 mm percussion drill bit, made of refined special steel. Ideal for concrete, clinker, granite, and masonry. Features a carbide-tipped cutting edge and a 130° cutting angle. Includes a plastic bag.

[View product online](#)**Description**

The Ruko-210080 percussion drill bit is a professional tool designed to deliver exceptional performance when drilling hard materials. Made from refined special steel, this drill bit stands out for its high toughness and resistance, making it the ideal choice for working with concrete, clinker, granite, and masonry. Its optimized design allows for efficient penetration, guaranteeing precise and long-lasting results every time.

The cutting edge of the drill bit is equipped with a special carbide insert, providing an extraordinary alloy and superior strength, suitable for use in percussion drills with a drill chuck. With a 130° cutting angle, this drill bit ensures optimal performance and increased durability, thanks to its special, highly resistant welding.

Its cylindrical handle facilitates a secure grip and comfortable handling during operation.

- Dimensions: 8 x 200 mm
- Material: Refined special steel
- Applications: Concrete, clinker, granite, and masonry
- Use: Hammer drills with drill chuck
- Cutting edge: Special carbide plate
- Cutting angle: 130°
- Welding: Special and highly resistant
- Handle: Cylindrical
- Packaging: Individual plastic bag

Specifications

EAN	4007140020192
Manufacturer	Ruko
Material	Metal
Weight (kg)	0,0500
