Description

Witte-28375 impact bits are specifically designed to maximize the efficiency of professional cordless impact drivers. These bits offer superior strength and extended lifespan compared to standard bits, thanks to their innovative torsional shape, highly flexible material, and construction from specially hardened steel. With a compact 38 mm length, these bits allow for direct application in cordless impact drivers without the need for a bit holder, facilitating handling and control during work. These bits are especially recommended for screwdrivers operating with torques above 25 Nm, guaranteeing optimal performance in demanding tasks. Specific design for cordless impact drivers. Greater strength and lifespan compared to standard bits. Unique torsional shape that improves power transmission. Highly flexible material that reduces the risk of breakage. Made of specially hardened steel for greater durability. Compact 38 mm length for better maneuverability. Direct application without the need for a bit holder. Optimal integral torsion area for precise control. 1/4" guide for compatibility with various tools.

Individual blister pack (1 unit).
