Description

The Ruko-244809-1 protective cap is an effective solution for repairing female threads in aluminum and other soft metals. Made from high-quality polyamide plastic, this cap is distinguished by its toughness and elasticity, making it an ideal choice for various applications. Its versatile design allows its use in situations of varying severity, ensuring adequate and long-lasting protection for damaged threads.

- **Material:** High-quality polyamide plastic.
- **Application:** Repair of female threads in aluminum and soft metals.
- **Toughness:** High resistance to impacts and deformation.
- **Elasticity:** Ability to adapt to different conditions of use.
- **Mechanical Properties:** Excellent performance over a wide temperature range.
- **Versatility:** Designed for multiple uses, regardless of the severity of the damage.
- **Durability:** Resistant to wear and corrosion.
- **Easy Installation:** Simple process that requires no special tools.
- **Compatibility:** Ideal for industrial and maintenance applications.
- **Dimensions:** Adaptable to different sizes of female threads.

The Ruko-244809-1 protective cap is a reliable option for those seeking an effective solution for thread repair, guaranteeing optimal and prolonged performance.

Specifications

High	3,00
Width	3,00
EAN	4007140358684
Manufacturer	Ruko

Weight (kg)	0,0600
Depth	11,00
