Description

The Ruko-244809-4 protective cap is an effective solution for repairing female threads in aluminum and other soft metals. Made of high-quality polyamide plastic, this cap is distinguished by its toughness and elasticity, making it an ideal choice for a variety of applications. Its versatile design allows for use in situations of varying severity, ensuring a reliable and long-lasting repair. The mechanical properties of polyamide guarantee optimal performance under a wide range of conditions, making it indispensable for restorers and professionals in the sector.

- **Material:** High-quality polyamide plastic
- **Compatibility:** Suitable for aluminum and soft metal threads
- **Toughness:** High resistance to impact and deformation
- **Elasticity:** Ability to adapt to different conditions of use
- **Versatility:** Designed for multiple repair applications
- **Mechanical properties:** Excellent performance under a wide range of conditions
- **Ease of use:** Quick and easy installation
- **Durability:** Resistant to wear and corrosion
- **Dimensions:** Specifically designed for female threads No. 4
- **Professional Use:** Ideal for restorers and mechanical technicians

Specifications

High	3,00
Width	3,00
EAN	4007140358714
Manufacturer	Ruko
Weight (kg)	0,0600

Depth	11,00
